mt7
tech

Dear
We would like to offer you the most modern
currency exchange machine -
Kantor Mt7.tech

It was created on the basis of many years of experience of MATinternet in the construction of self-service payment devices and detailed legal analysis in the field of counteracting money laundering and terrorist financing.

The management system – Kantor Mt7 –

is responsible for the transactions performed on the device.

The system has been tested by industry analysts and has received a positive legal opinion on the transaction path, with particular emphasis on legal guidelines.

Substantive research and legal analysis unequivocally state that:
Kantor Mt7 - is the first Currency Ticket Office that meets the legal requirements in
terms of compliance with the Act on Counteracting Money Laundering and Financing of
Terrorism (Journal of Laws of 2018, item 723, as amended).

The Mt7 currency exchange machine has the following features that guarantee compliance with the applicable law :

- Face Scan
- Scanning and identification of the authenticity of identity documents.
- Comparing photos of the face from the camera scan with the photo obtained from the ID scan.
- Automatic detection of people making another transaction in the vending machine – with the possibility of remote blocking of transactions.
- Transaction procedure related to PEP.
- Transaction procedure related to the current policy of the Exchange Office, its regulations and restrictions related to the level of risk in a given location.
- Transaction procedure related to AML.

Technical Specifications

VANDAL-PROOF ENCLOSURE LOCKED WITH A SAFE LOCK

There are two zones in the enclosure – each zone has a separate door and locks:

- Technical zone
- Payment zone

BANKNOTE DISPENSER

An extremely technologically advanced device for issuing banknotes. We can configure the number of trays in the range from 4 to 12 dispensing cassettes. A cassette is responsible for one denomination. We can put up to 500 banknotes in the cassette.

HOPPERS

Very efficient devices used for dispensing coins, with a very high speed of operation. They guarantee that change is given with an accuracy of 1 penny. The device is equipped with 4 hoppers, each with a capacity of up to 1000 coins.

BANKNOTE ACCEPTOR

Accepts banknotes individually and in files. Rejects damaged banknotes and banknotes that have not passed advanced verification. An important distinguishing feature of this solution is the excellent efficiency of accepting banknotes fed in files. Accepts files of up to 100 banknotes submitted for deposit

CAMERA

Used to scan the customer's face in order to identify them and compare them with the presented identity document.

ID READER

Responsible for advanced identification of identity documents. Verifies the authenticity of a document based on the identification of all security features of the document. It allows you to automatically load data from a document. Automatic scanning makes customer service easier and faster.

PAYMENT CARD READER

Designed for use in self-service devices. Very efficient and fast in operation. Supports cards of all card issuers. The cards can be contactless or contactless.

21,5" TOUCH SCREEN

Screen dedicated to continuous operation in difficult conditions. Its main advantage is the increased brightness of the image. This feature is extremely important in the case of high and varied intensity of external light, it affects the quality of service, the readability of the interface and the efficiency of transaction handling. The screen has been equipped with the highest quality touch. The instant response of the matrix and the precision of the received stimuli make communication with the device very easy and pleasant.

PRINTER

This is a device designed for titanic work. It works extremely quickly and efficiently. Each receipt appears instantly, and thanks to intelligent software, the printer waits for the receipt to be downloaded, after receiving the printout, the next document is issued. The printer allows you to use very large rolls of up to 350 meters. This guarantees long operation of the device without the need for troubled operation, and eliminates interruptions in the operation of the machine caused by the lack of consumables.

Management

(CEM) KANTOR MT7 IS A DEVICE MANAGED COMPLETELY REMOTELY

The currency exchange machine can be managed from a computer or a phone with Internet access.

Both issues:

- technical,
- operating,
- reporting or settlement - are carried out remotely.

The owner of the CEM has full insight into its current work

A state information:
active / inactive

1

What is the status of the consumables
– e.g. the amount of paper in the printer

2

Balances in individual money
hoppers – the system
sends alerts when the minimum
or maximum is exceeded

3

What transactions have been carried out:
Purchase / Sale / Of what value / With which
banknotes the transactions were made

4

Access to sales reports:
Daily / Periodic / Analytical

5

Configuration – variants

01

VARIANT I

- **Accepts** banknotes up to 4 different currencies
 - Banknotes 1200 pcs - **SINGLE**
- **Dispenses**
 - Banknotes **2000 pcs – 4 cassettes** of 500 pcs
